# Async brainstorming

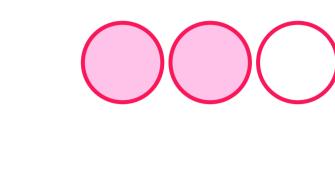

## A brainstorm method tailored for async collaboration

### INTRODUCTION

Design an inclusive and effective brainstorm with this template tailored for async collaboration. These activities are great when calendars are packed, participants can't meet live because of time zone conflicts, or when you just want to give collaborators more time to think about their ideas.

People 2 - 20

1-2 hours

**Difficulty** Intermediate

### **AGENDA**

- 1 Define your problem statement
- **2** Brainstorm
- **Group ideas**
- 4 Prioritize

### PREPARATION FOR ASYNC WORK

Before sharing this mural with collaborators, review the facilitation recommendations for async projects. Then, define the problem statement and fill out section 1.

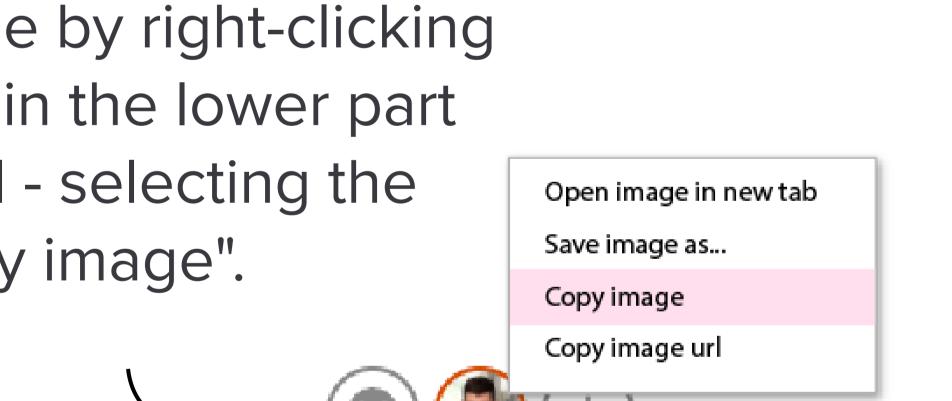

Provide collaborators with a timeline for each phase of the brainstorm — then explain the activity checkpoints below. Consider recording a quick explainer video, if collaborators are unfamiliar with async collaboration.

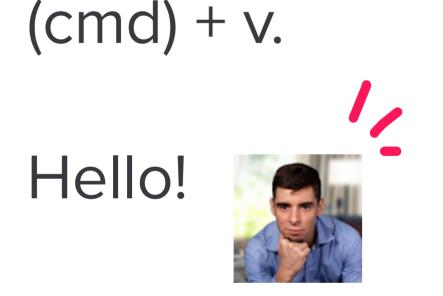

## **ACTIVITY CHECKPOINTS**

Add your profile picture here to help track the team's progress. After you finish an activity, move your avatar below.

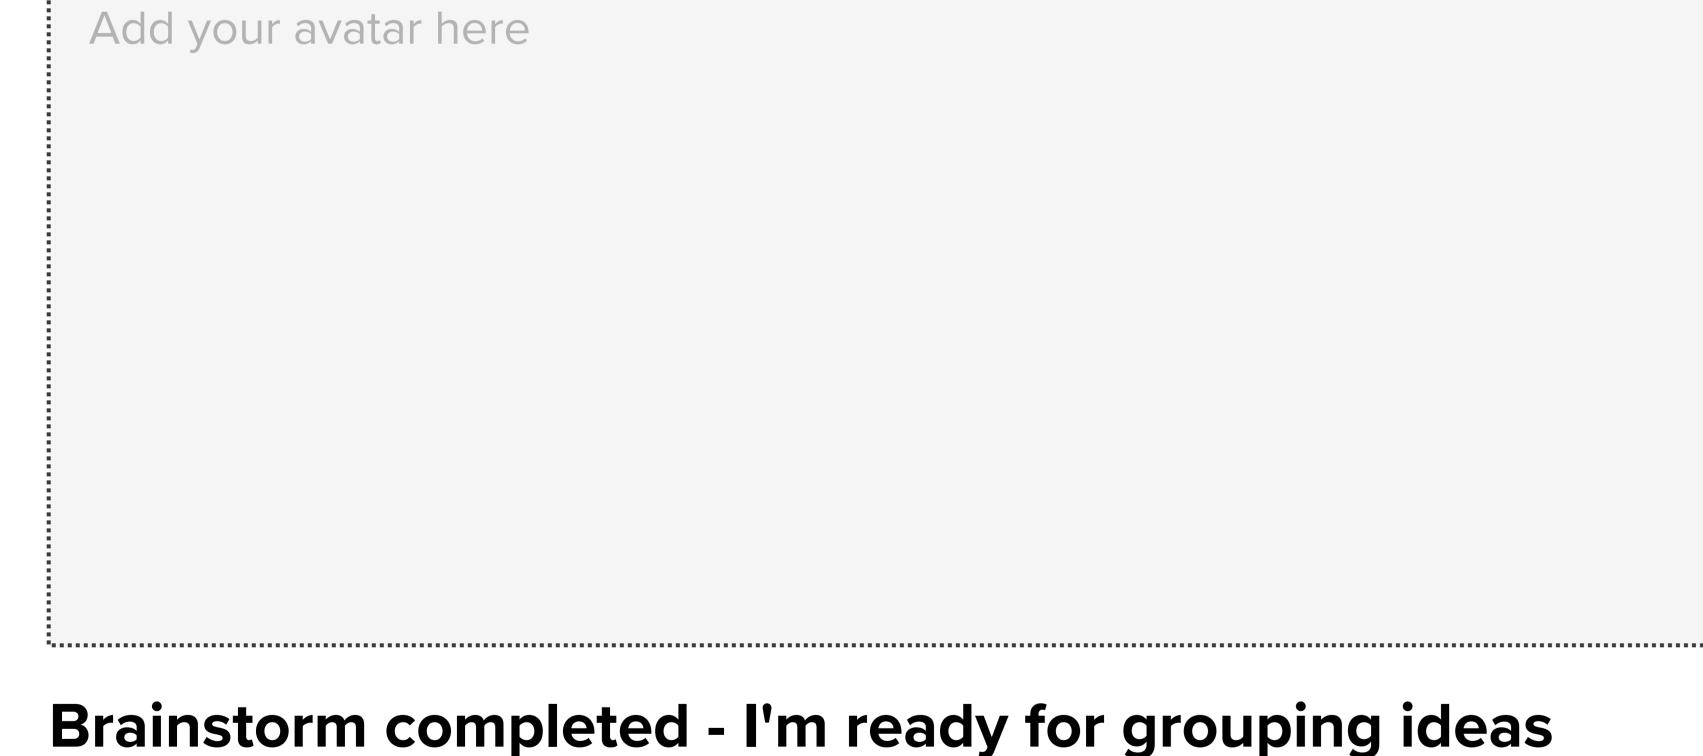

You can easily add your profile image by right-clicking your avatar in the lower part of the mural - selecting the option "copy image".

Left-click any part of the mural and paste the image with ctrl (cmd) + v.

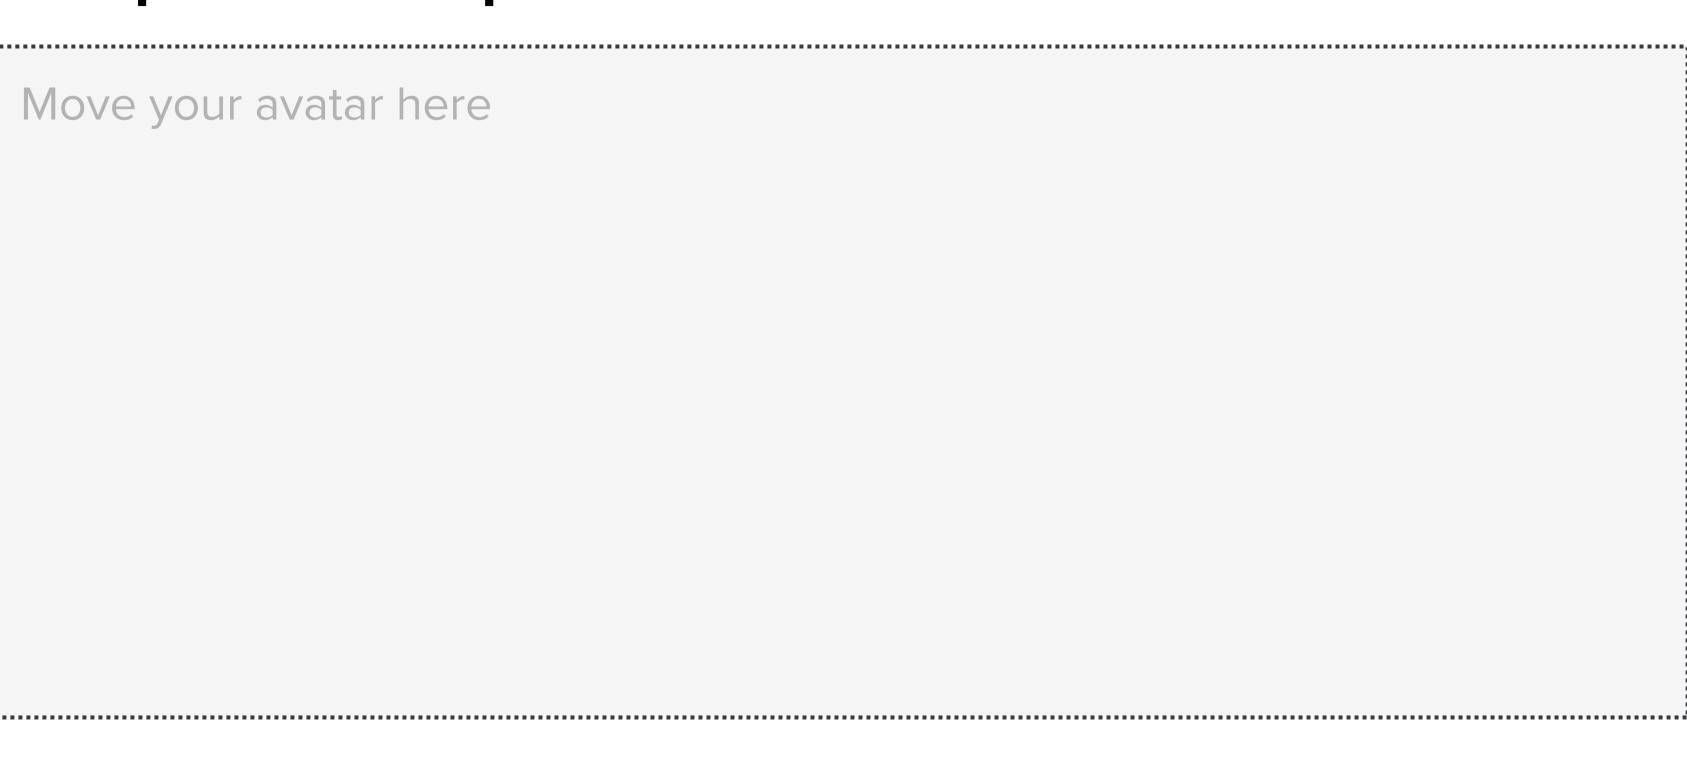

Starting point - I have read the problem statement

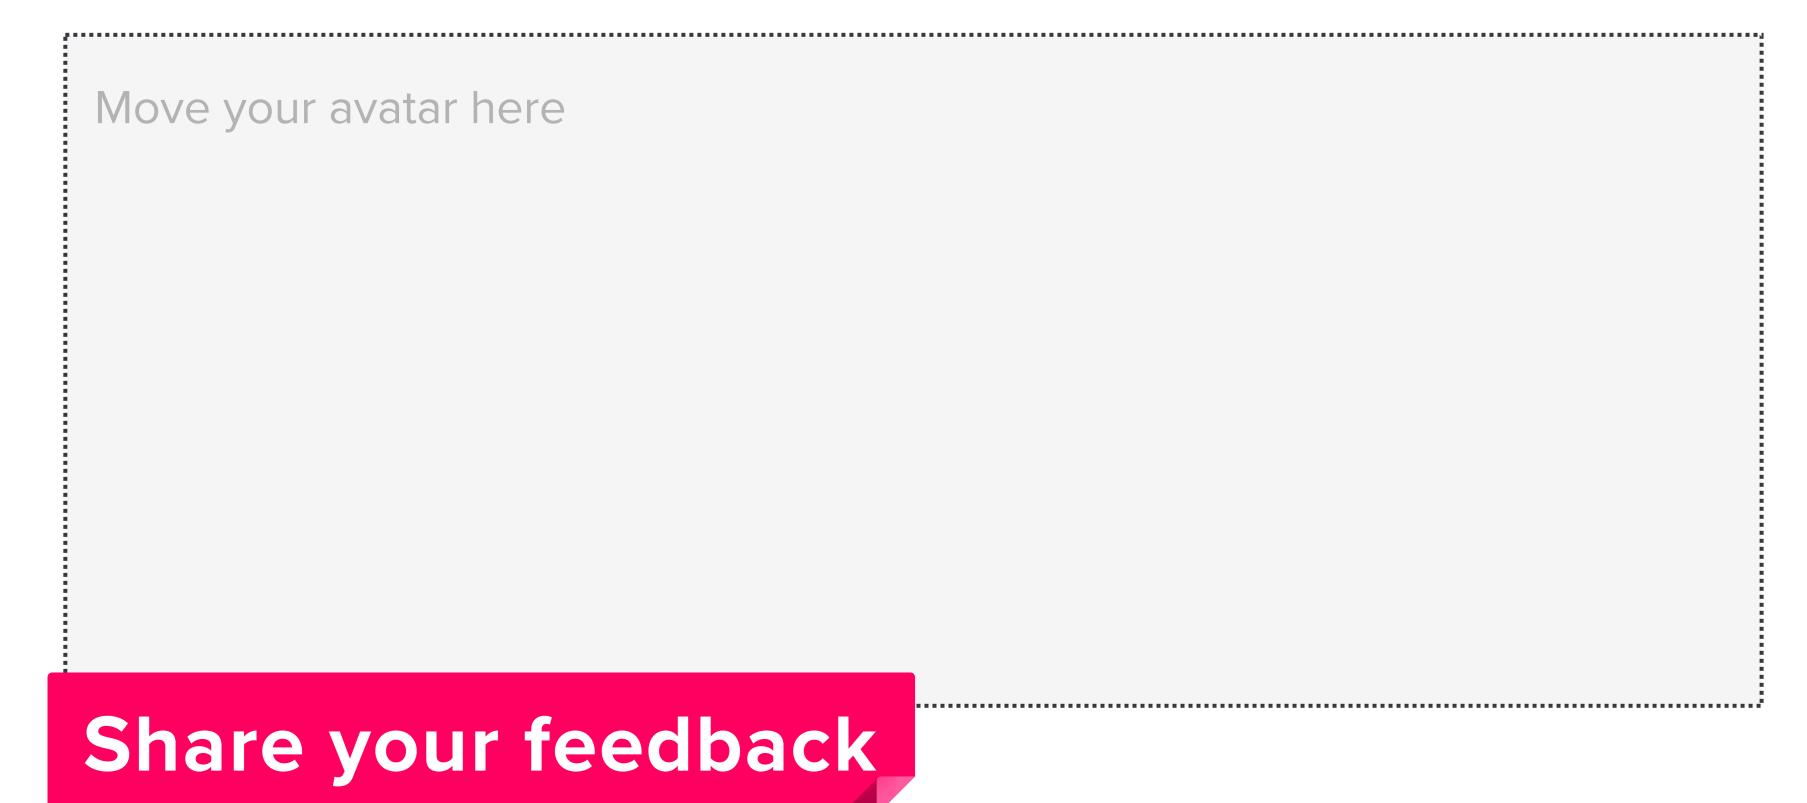

Group ideas completed

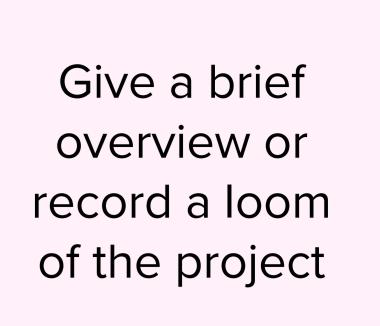

Goal reached - I have finished the prioritize step

## Define your problem statement

What problem are you trying to solve? Frame your problem as a "How Might We" statement. This will be the focus of your brainstorm.

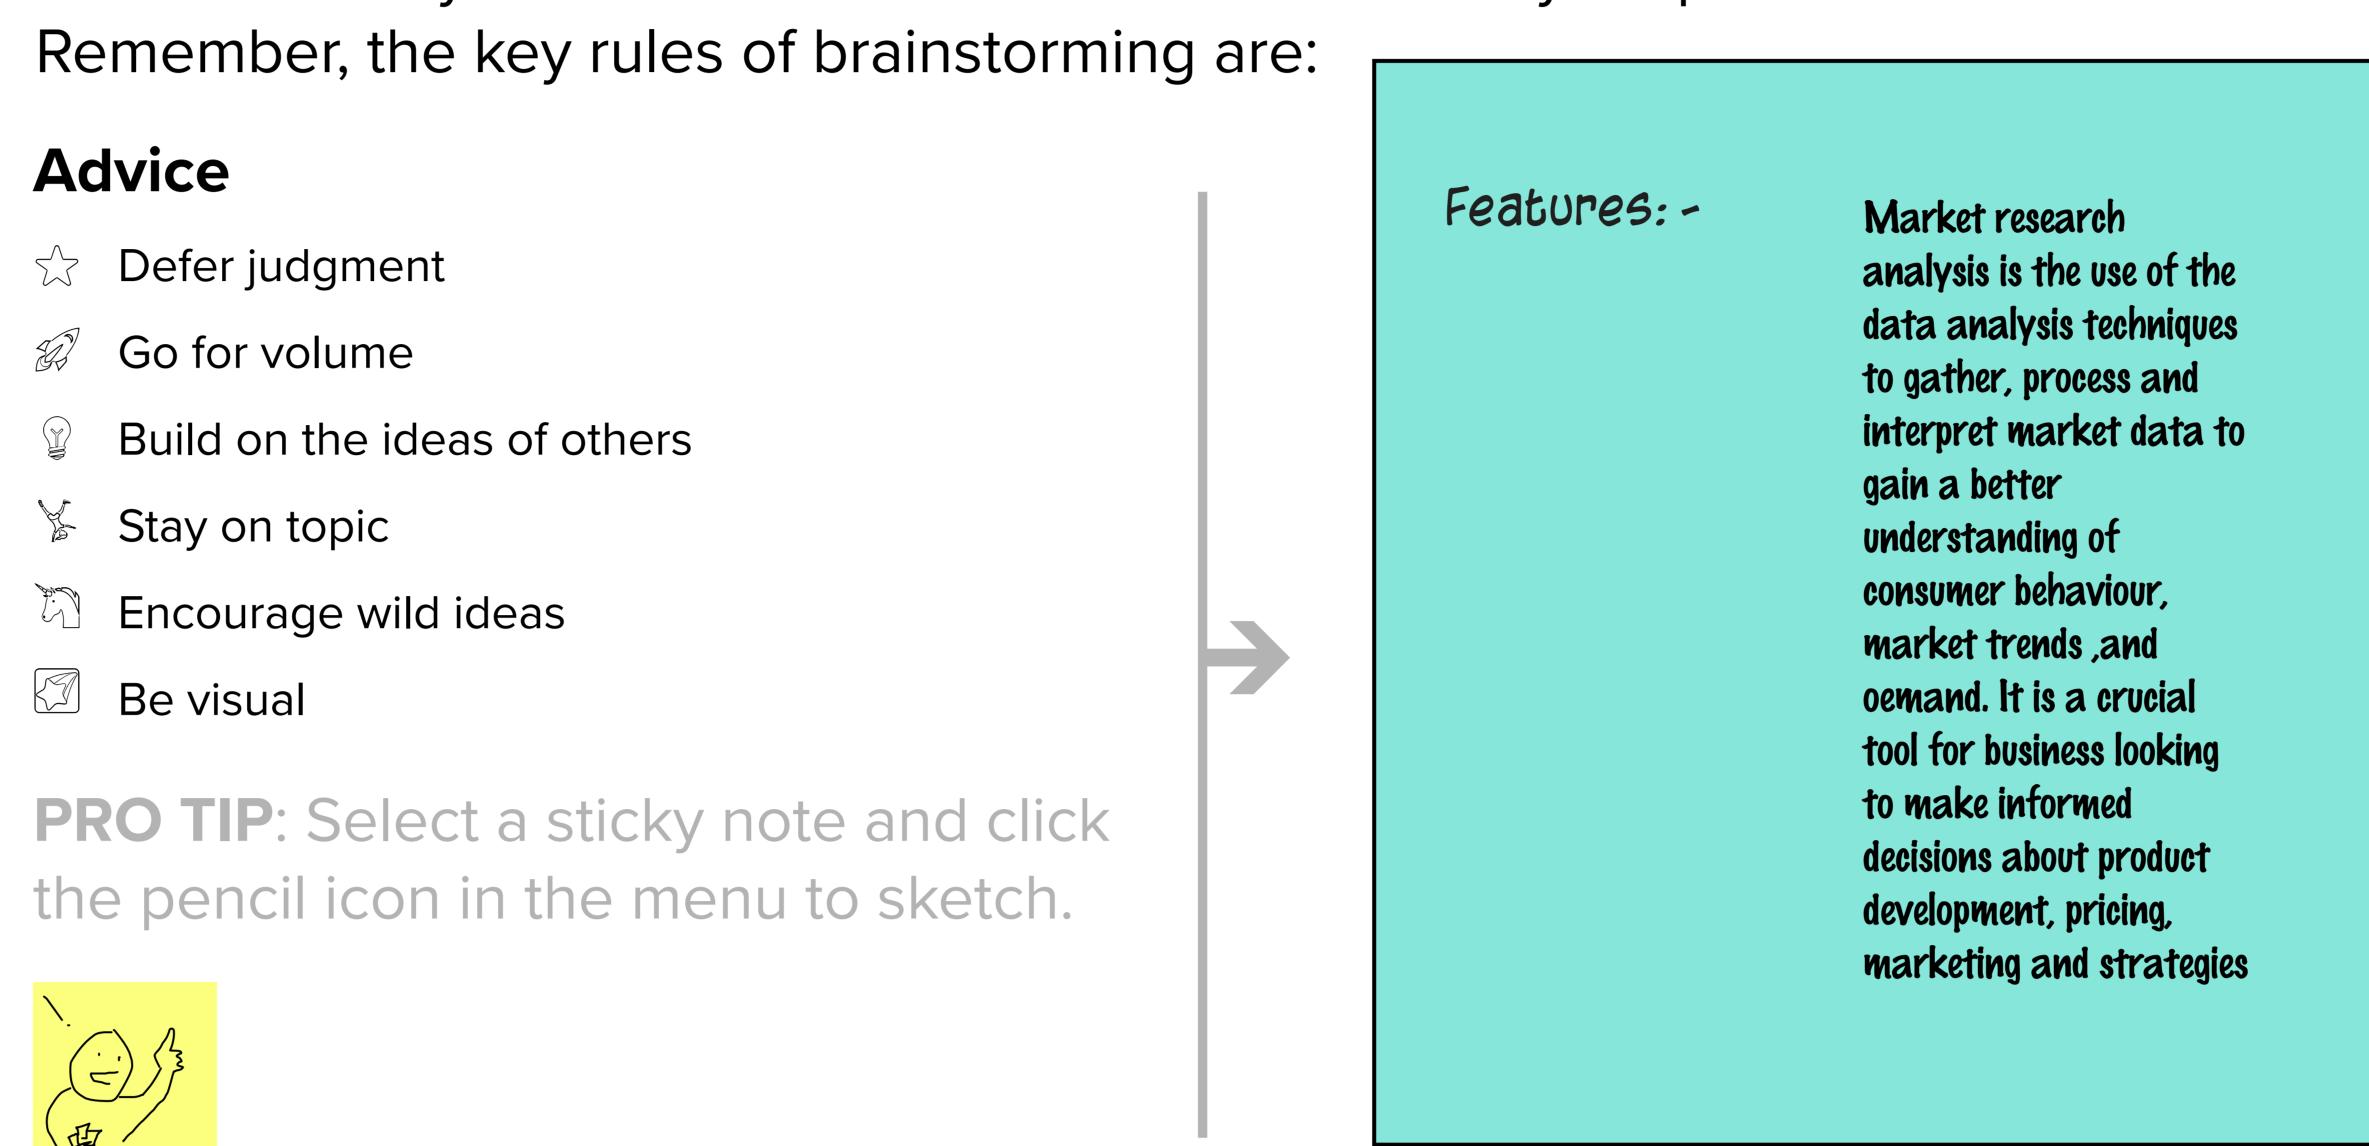

UNVEILING MARKET INSIGHTS [ANALYSING SPENDING BEHAVIOR AND IDENTIFYING OPPORTUNITIES FOR GROWTH How Might We \_

## Brainstorm

Write down any ideas that come to mind that address your problem statement.

DEFINING PROBLEM UNDERSTANDING CONSUMER NEEDS AND PREFERENCE One of the most important aspects of market research analytics is the ability to understand consumer needs and preferences. This is accomplished through data collection and analysis methods such as surveys, focus groups and customer feedback analysis. The insights gained from this data can help Businesses identify what their customers want and tailor their products and marketing strategies accordingly. For example by understanding which features are most important to customers a Business can prioritize product development efforts and make mose informed decision about product design and features.

SPECIFY THE PROBLEM Another key rote of market research analytics is to identify market trends.By analysing IDENTIFYING MARKET TRENDS: market data, Businesses can gain a deeper understanding of the current market landscape, Including the sixo and growth rate of the market, and any emerging trends or shifts. This information can be used to make informed decisions about product development pricing. Marketing and sales strategies. For example, if a Business Identifies a trend toward ecofriendly product it can shift its focus to developing products that meet this demand and capitalize on this market opportunity.

## Group ideas

The facilitator should group all the ideas from the brainstorming process (step 2). After that, you should add your opinions by adding arrows to point ideas into other groups and sticky notes and icons to share your thoughts.

PRO TIP: This is a great place to use color coding. You can change the color of multiple sticky notes at once.

## **Group 1** REQUIREMENT COMPETITOR ANALYSIS:

Market research analysis can also be used to forecast market demand allowing Businesses to make informed decisions about future product development insights into the competitive landscape. By analysing date on competitor products,marketing strategies and customer feedback, Businesses can identify areas where they can differentiate themselves and gain a competitive edge. For example,a Business may discover that it's competitors are not meeting the needs of a particular market segment, and can use this information to develop products and marketing strategies that specifically Target this segment.

Group 2 Market research analysis provides valuable insights into customer behaviour and inform tha planing and execution of marketing

preferences that can be used to campaigns this can include identifying tha most effective channels for researching larger customers developing messaging that resonates with customers and determining tha best time and frequency for marketing messages.

Group 3 Market research PRODUCT DEVELOPMENT analytics can be IMPROVING CUSTOMER RELATIONSHIPS: development of new products and

services by gathering information on customer needs and preferences. This information can they be used to design and develop products that better meet customer needs. Increasing the chances of success in the market.

Group 5

Finally, market research analytics can also be used to improve customer relationships. By understanding customer needs and preferences, Businesses can tailor their products and marketing strategies to better meet customer needs, leading to increased customer satisfaction and loyalty. Additionally, by using customer feedback to make improvements to customer satisfaction and Build stronger relationships with their customers.

Group 6

Market research analytics can FORECASTING MARKET also be used to forecast market demand, allowing Businesses to make informed decisions about future product development, pricing and marketing strategies.By analysing historical data, market trends, and consumer Behaviour Businesses can make accurate predictions about future market demand and adjust their strategies accordingly. For example if a business forecasts a decline in demand for a particular product it can reduce production and marketing efforts for that products, or shift its focus to other products with higher potential for

## Literature survey:

Customer satisfaction analysis:-

Market research analysis can be used to measure customer satisfaction with a company's products, services or overall customer experience this information can then be used to identify areas for improvement and to create action plans to address customer needs.
